

Rescue Basket

LSC's original compact Rescue Basket is **standard equipment aboard all US Coast Guard rescue helicopters**, and in service with numerous international military & civilian operators. Revised design for 2007 incorporates cast lifting eyes and lifetime tubular hinges eliminate cable maintenance and reduces inspection requirements. The frame opening has been enlarged to better accommodate two adults without increasing the overall dimensions, and an integrated, yet flexible stainless steel bail retainer has been added to keep the bails from dropping after removing the hoist hook. The frame of the Basket is constructed of tubular stainless steel for low maintenance & the bail assembly folds into the basket for compact stowage. Bottom is enclosed with a plastic mesh liner with 1" openings. Basket provides excellent flotation performance and is self-righting with 100% reserve buoyancy. Float covers have reflective markings and are printed with safety pictorials. Measures 44½" long x 25" wide x 41" high assembled and only 21" high when stowed. Weight: 39 lbs. NSN: 4240-01-HS1-9969.

Product Specifications

General

Weight: 38 lbs (approximate).
Size: 25" W x 44.5" L x 41" H (21" H stowed).
Inspections: Every 30 days and Visual, prior to each use.
Cleaning: Fresh water rinse with mild detergent after each use.
WLL: 600 lbs. Working Load Limit.

Materials

Flotation: Ethafoam cylinders (closed-cell foam, marine grade) with Intl. Orange 1050 denier Ballistics Nylon covers. 3M® brand SOLAS-grade reflective markings.
Liner: Semi-rigid plastic net.
Frame/Bails: 5/8" & 3/8" OD x 0.065" wall Type 304 stainless steel tubing members with 1/8" & 3/16" thick flat-stock members. TIG welded. Electro-polish or powder coat finish.
